# About Us

County Propane is ready to serve all of your commercial and residential needs from the indoors out. Our team of experts will be sure you get the propane solutions designed to meet your needs.

The Founder of County Propane is a third-generation provider with over 35 years of propane experience within residential, commercial, multifamily, mixed use, and retail building.

Our propane system installation professionals are fully trained and will provide you with expert service from beginning to end of any tank installation project. They will also train you on how to use and maintain your propane system to ensure that you have the most energy efficient system possible.

## Why Wait - Call Today

# Services

## Restaurants

The best chefs know that the secret ingredient for their food is cooking with propane. County Propane services restaurants of all different capacities. We service and repair all propane commercial kitchen equipment and have a 7 day on call service.

## Remodelers

We provide installation and maintenance of underground tanks, gas hook-ups to generators, pool heaters, outdoor cooking areas, and all other outdoor propane appliances. We also provide top-quality propane solutions for interior design renovation and for kitchens, bathrooms, basements, and more! We undertake every project with serious attention to quality, cost, and time.

Serving Southeast PA Since 1984

## Homebuilders

Whether you're starting a new development from scratch or building someone's dream home, propane can provide you with a much-needed edge. No job is too big or too small for County Propane. We cater to builders, working closely with them to keep important deadlines on track. Our experienced propane specialists provide all technical knowledge that builders need. We make their job easy. Whether it be one house, fifty houses, townhouses, warehouses, single stores, or shopping centers, we do it all. Before you start your next project, be sure to contact County Propane.

## Hot Water Heaters

According to the American Council for an Energy-Efficient Economy, the average U.S. household uses more than 19,000 gallons of hot water each year. Of that, an average of 55 gallons per day is used for bathing, washing dishes, doing laundry, and general cleaning. Propane water heaters have a rapid recovery rate, meaning they can efficiently meet your daily demands for hot water in a cost-effective manner using less energy than electric. County Propane is certified to install both tank and tankless heaters, our tankless water heaters allowing an endless supply of hot water.

## Appliances

No more waiting for the electric burner to heat up. Instead, enjoy precision cooking with propane. Propane allows for more efficient clothes drying, room heating, and cooking with exact temperatures and even heat distribution.

**Our Team Will Design the Propane  
Solutions to Meet YOUR Needs**

# Energy Efficiency

Propane is made in North America, which keeps thousands of your neighbors and friends employed producing America's own energy source. 97% of our propane supply is made in North America, and 90% of that is made in the USA.

## Clean Energy

Propane is clean and environmentally friendly in its unused state. It is not harmful to soil if spilled nor will it cause harm to drinking water supplies. Propane vapor will not cause air pollution and is not harmful if inhaled by birds, animals, or people.

Propane produces exhaust emissions that exceed the requirements for clean fuel vehicles and surpasses eco-friendly expectations in all aspects. In fact, propane is not considered a greenhouse gas at all. Most propane-fueled vehicles are

certified by the Environmental Protection Agency (EPA) as meeting the Ultra Low Emission Vehicle requirement. On top of that, the U.S. Government energy policy makers and energy administrative bodies have listed propane as an approved clean fuel.

According to the most recent national average fuel prices study from the U.S. Department of Energy, it would cost twice as much to operate your range, water heater, dryer, or furnace with electricity as with propane gas.

# Home Builders Incentive Program

Building with Propane Means Revenue for You and Savings for Your Homebuyers

**When you incorporate propane within your home(s) or your community, you can expect:**

- **Increased Revenue:**

Homeowners prefer gas appliances and are willing to pay a premium for it.

- **Increased Productivity:**

We will design and install a delivery system tailored to your home(s) or community, meaning no additional subcontractors are required.

- **Disruption-free Build:**

We will coordinate with your team to ensure our installation won't disrupt your construction timeline.

- **Decreased Costs:**

Propane appliances require fewer contractors and can be installed at a lower cost when building your home(s) or community. Plus, we will provide temporary heat when you are building at a low cost and hassle-free.

- **Increased Value to Homebuyers:**

We'll provide educational materials about the benefits to the environment, monthly savings, and efficiencies of using propane that you can leverage during the sales process to help address the desires of many buyers: ongoing savings and a reduced carbon footprint.
